

Chen Tetroashvili – Software Developer

Email: chenush270@gmail.com | **Phone:** 0532788704

Summary

Computer Science student (3rd year, HIT College), with strong technical foundation in programming (C, C++, C#, Java, Python, JavaScript) and practical experience in web development (Node.js, React, Express). Highly motivated, fast learner, and eager to contribute to software development teams.

Technical Skills

Languages: C, C++, C#, Java, Python, JavaScript, TypeScript

Frontend Development: HTML, CSS, React, Vite

Backend & Database: Node.js, Express, MongoDB, MySQL

Developer Tools: Postman, GitHub

Other: Microsoft Office (Word, Excel, PowerPoint, Outlook)

Professional Experience

Administrative Assistant – Head of Quality Control Division, Elta

(2025–2024)

- Managed calendar, scheduling, and administrative tasks .
- Coordinated with HR and organized team-building activities .
- Supported project workflows and documentation .

Military Service, Air Force Headquarters – Career Service (2023–2022)

- Handled logistical requests and procurement with external vendors .
- Drafted official documents and supported cross-team projects .
- Gained experience in task prioritization and decision-making under pressure .

Military Service, Air Force – Regular Service (2022–2020)

- Avionics Technician (Yasur helicopters): Diagnosed and repaired technical issues in onboard systems (software & mechanical) .
 - Ensured operational readiness of aircraft systems through hands-on troubleshooting.
-

Education

B.Sc. Computer Science, HIT College (2024–2026, currently 3rd year) - Focus on software development, data structures, and web technologies. Full High School

Projects

Packet Classification Project

This project focuses on network packet classification using Machine Learning in Python.

The goal was to classify network traffic based on packet features into different categories.

The project was implemented in a Google Colab Notebook and includes:

- Data preprocessing
- Feature engineering
- Model training (Logistic Regression, Random Forest, etc.)
- Hyperparameter tuning with GridSearchCV
- Evaluation of model performance

Full-Stack Personal Portfolio Website

Developed a professional end-to-end Full-Stack portfolio website to showcase projects, work experience, and technical skills. Built using a Client-Server architecture, smooth user experience (UX), and dynamic data communication.

Key Technologies:

- Frontend : React, Vite, React Router Dom.
- Styling : Bootstrap 5, CSS3 (Responsive Design).
- Backend : Node.js, Express.js.
- Database : MongoDB, Mongoose (ODM).
- Tools : Axios (API calls), Postman (API Testing), Git, Dotenv.

Languages

- **Hebrew:** Native
- **English:** Fluent
