

Chen Tetroashvili – Software Developer

Email: chentetroo@gmail.com | **Phone:** 0532788704

Summary

Computer Science student (3rd year, HIT College), with strong technical foundation in programming (C, C++, C#, Java, Python, JavaScript, TypeScript) and practical experience in web development. Highly motivated, fast learner, and eager to contribute to software development teams.

Technical Skills

Languages: C, C++, C#, Java, Python, JavaScript, TypeScript

Frontend Development: Next.js, React, HTML, CSS

Backend & Database: Node.js, Express, MongoDB, MySQL

Developer Tools: Postman, GitHub, Vitest, Cursor

Other: Microsoft Office (Word, Excel, PowerPoint, Outlook)

Professional Experience

Administrative Assistant – Head of Quality Control Division, Elta

(2025–2024)

- Managed calendar, scheduling, and administrative tasks .
- Coordinated with HR and organized team-building activities .
- Supported project workflows and documentation .

Military Service, Air Force Headquarters – Career Service (2023–2022)

- Handled logistical requests and procurement with external vendors .
- Drafted official documents and supported cross-team projects .
- Gained experience in task prioritization and decision-making under pressure .

Military Service, Air Force – Regular Service (2022–2020)

- Avionics Technician (Yasur helicopters): Diagnosed and repaired technical issues in onboard systems (software & mechanical) .
 - Ensured operational readiness of aircraft systems through hands-on troubleshooting.
-

Education

B.Sc. Computer Science, HIT College (2024–2026, currently 3rd year) - Focus on software development, data structures, and web technologies. Full High School Diploma

Projects

Expense Management System — React, Vite, Node.js, Express, MongoDB, Mongoose

Developed a full-stack expense tracking application to help users record spending and monitor financial patterns.

Built REST API endpoints with Express and MongoDB for expense CRUD operations and client-server data sync.

Created a modern frontend with React + Material UI and Axios integration for a smooth user experience.

Deployed the application and maintained source control/versioning with Git and GitHub.

Engineering Portfolio & Intelligent Chatbot | AIDD Methodology

AI-driven development focused on advanced architecture and rigorous quality control.

Tech Stack: Developed with Next.js, React, and TypeScript. Leveraged Tailwind CSS for an accessible monochromatic design and integrated Vercel AI SDK to connect multiple LLMs.

Strategic AI Planning: Constructed detailed Work Plans for every feature, segmented into predefined Phases and Steps in collaboration with AI Agents to ensure full traceability.

Rules & Commands Management: Implemented custom Cursor Rules (.mdc) and commands to enforce Folder-Role-Separation architecture, WCAG AA accessibility standards, and Clean Code principles.

Agentic Code Review: Established a recursive feedback loop where AI serves as an active Code Reviewer, identifying logic, security, and syntax issues before component approval.

Automation & Quality Assurance: Integrated Vitest to verify feature integrity (including the chatbot and UI components) in strict alignment with predefined work plans and architectural rules.
