About Me

Full Stack Developer specializing in **React**, **Next.js**, **TypeScript**, **JavaScript**, and **Node.js**, with hands-on experience building scalable end-to-end applications with emphasis on Software Architecture and Component Architecture. Passionate about creating seamless user experiences through Responsive Design and AI-integrated systems.

Experience

2024-2025:

Administrative Assistant – Head of Quality Control Division, Elta

- Managed calendar, scheduling, and administrative tasks .
- Coordinated with HR and organized team-building activities .
- Supported project workflows and documentation .

2022-2023:

Military Service, Air Force Headquarters – Career Service

- Handled logistical requests and procurement with external vendors .
- Drafted official documents and supported cross-team projects .
- Gained experience in task prioritization and decision-making under pressure .

2020-2022:

Military Service, Air Force – Regular Service

Diagnosed and resolved complex avionics and onboard system failures under operational constraints.
Performed technical troubleshooting on mission-critical aircraft systems with high precision requirements.
Worked in high-pressure environments requiring rapid problem solving and strict procedural compliance.

Education

B.Sc. Computer Science, HIT College (2024–2026, currently 3rd year) - Focus on software development, data structures, and web technologies.

GPA: 90

Full High School Diploma.

Projects

Expense Management System —

Live project: <https://expensemanagementsystem-frontend.onrender.com/login>

Tech: **React**, **Vite**, **Node.js**, **Express**, **MongoDB**, **Mongoose**

- Developed a full-stack expense tracking application to help users record spending and monitor financial patterns.
- Built REST API endpoints with Express and MongoDB for expense CRUD operations and client-server data sync.
- Created a modern frontend with React + Material UI implementing efficient State Management and Axios for a smooth user experience.
- Deployed the application and maintained source control/versioning with Git and GitHub.

Engineering Portfolio & AI Chat Platform

Live project: <https://newportfolio-sigma-seven.vercel.app/>

Tech: **Next.js**, **React**, **TypeScript**, **Tailwind**, **Vercel AI SDK**, **Vitest**

- Built an AI-powered full-stack web platform with modular architecture and reusable component design.
- Developed intelligent chatbot workflows integrating LLM APIs using Vercel AI SDK.
- Designed scalable frontend architecture following strict separation-of-concerns and accessibility standards.
- Implemented automated testing workflows using Vitest to ensure reliability and maintainability.
- Created AI-assisted engineering workflows using Cursor Rules and structured development plans.

Technical Skills

Languages: C, C++, C#, Java, Python, JavaScript ,TypeScript.

Frontend Development: Next.js, React, Responsive Design, HTML, CSS.

Backend & Database: Node.js, Express, REST APIs, MongoDB , MySQL ,Firebase.

Developer Tools & Methodologies: Postman , GitHub (Git workflows) , Vitest (Testing) , Cursor.

Other: Microsoft Office (Word, Excel, PowerPoint, Outlook)

Languages

Hebrew: Native

English: Fluent
